Evaluation:

Compliance with the requirements of Regulation (EU) 2023/915 regarding the parameters analyzed.

According to Regulation (EC) Nr. 2023/915 the MRL of inorganic arsenic for parboiled rice and husked rice is 0,25 mg/kg. This limit is kept by the sample analyzed.

Compliance with the requirements of Regulation (EC) No. 396/2005 regarding the parameters analyzed.

The results of the residue analysis do not indicate a violation of the provisions set by Organic Regulation (EU) 2018/848.

Evaluation of the findings according to the BNN orientation value:

The present sample complies with the private standard of the BNN e.V. considering the BNN orientation value regarding the parameters analyzed.

The requirements of the BNN e.V. regarding the orientation value for the pesticides is summarised in the table below.

Orientation value for individual substances passed ($\leq 0,010$ mg/kg*). YES

Orientation value for individual substances passed when considering the expanded measurement uncertainty of $\pm 50\%$ ($\leq 0,021$ mg/kg*). YES

Maximum number of individual substances passed (max 2 single substances $\geq 0,010$ mg/kg* WITHOUT consideration of the expanded measurement uncertainty of $\pm 50\%$). YES

*insofar as no other interpretation rules or explanation by BNN e.V. exist

The legal assessment is based on European regulations, the LFBG and the legal and implementing provisions issued pursuant to this law. Furthermore, the evaluation is based on the guidelines outlined in document 'SANTE/11312/2021'.

The results refer exclusively to the examined sample (as received)

If the sampling and transport were not carried out by GALAB, it is possible that the sample may have been influenced prior by incorrect selection or insufficient cleaning of the sample containers or lack of preservation/cooling. We recommend to check any findings in this respect critically.
